

Phase 4

Total session 9

Day 8 : 31 Jan 2024

Frontend technologies

Rest API for product ie Fake Rest API

Ng g c product → component

Ng g class product (class model)

Ng g s product (service class)

Open the notepad and we will create few json data.

products.json

node js provided external module **json-server**. Which help to same static json file as rest api

npm install -g json-server

json-server products.json

json-server products.json --watch

by default json server run on port number 3000.

product.json

Create new angular project

ng new product-app

routing → no

styling → css

cd product-app

ng g c product (component)

ng g class product (model)

ng g s product (service)

Angular Pipe

Angular provided lot of pre defined pipes which help to format the data on template.

Pre defined pipes are

Upper

Lower

Currency

Date

Etc
